

THE AI YOUR CONTRACTS ALLOW.

A sealed machine on your own network. It drafts your filings and writes working software. Installed in a day, owned outright.

01 PROHIBITED. Controlled data is barred from public AI tools. CUI in ChatGPT is a reportable DFARS 252.204-7012 incident, with a 72-hour clock.	02 SHADOW USE. Written policy does not stop it. Staff use whatever finishes the job fastest. The fix is a sanctioned tool on your own network.	03 ENFORCEMENT. DoD suspended the CMMC Phase 2 deadline; safeguarding rules never paused. A Navy contractor paid \$507,144 over false compliance claims.
---	---	---

THE NODE

NODE 01 is NVIDIA-built hardware, configured and maintained by Splay inside your facility. It is not a chatbot: staff use it to draft proposals and compliance matrices, write working scripts and small tools, and search the documents you cannot upload.

No cloud account, no internet connection, no per-seat fees. We maintain the machine without ever holding your files.

Each install is one documented image with a runbook. Any competent IT shop could run it without us.

NODE-01

STATUS: SEALED

SILICON	NVIDIA GB10 GRACE BLACKWELL
MEMORY	128GB UNIFIED
MODELS	TOP OPEN WEIGHTS
ACCESS	WHOLE OFFICE, UNMETERED
NETWORK	LAN ONLY. AIR-GAP CAPABLE
INSTALL	ONE DAY, TRAINING INCLUDED

FROM \$14,500 INSTALLED

FIRST YEAR OF MANAGED CARE INCLUDED.
\$600/MO AFTER. LARGER BUILDS TO ORDER.

	SPLAY NODE	GOV-CLOUD AI	PUBLIC AI TOOLS
PERMITTED FOR CUI	YES	YES, AFTER MIGRATION	NO
YOUR DATA LIVES	IN YOUR BUILDING	MICROSOFT GOV CLOUD	ON VENDOR SERVERS
SETUP	FROM \$14,500	\$50,000+ MIGRATION	NONE
RUNNING COST	\$0 YR 1, THEN \$600/MO	~2X LICENSING/SEAT	\$25-30/SEAT/MO
COST TO ADD A SEAT	\$0	ANOTHER LICENSE	ANOTHER SEAT

Public tools remain fine for public work. The Node covers the work they are barred from. Gov-cloud figures are typical GCC High migration plus licensing uplift and vary by tenant. Hardware alone does not certify you.

SPLAY LLC 2026

THE LADDER.

Machines priced by the intelligence they run. Every price on this page is flat.

MACHINE	INTELLIGENCE, FRONTIER = 100	SERVES	INSTALLED, YR 1 CARE INCL.	CARE AFTER
NODE 01 DGX SPARK, 128GB	63 MINIMAX-M2.7	1-15 STAFF	\$14,500	\$600/MO
NODE 02 2X SPARK, LINKED, 256GB	67 DEEPSEEK V4 FLASH	16-30 STAFF, TWO MACHINES	\$26,500	\$900/MO
NODE 04 4X RTX PRO 6000, 384GB	73 MINIMAX-M3	15-100 STAFF, FAST	FROM \$99,500	\$1,500/MO
NODE 09 DGX STATION GB300, 748GB	85 GLM-5.2, BEST OPEN MODEL	15-100 STAFF	FROM \$165,000	\$2,500/MO

Intelligence: the strongest closed model = 100 (Artificial Analysis, July 2026); raw scores 38, 40, 44, 51 against the frontier's 60. Frontier models measure 130 to 144 on Mensa-style IQ tests (trackingai.org); these open models have no published score. Model cartridges swap. Offices that require US-origin weights run gpt-oss, Llama, or Nemotron; the machine is egress-denied either way. NODE 01 sits under the \$15,000 federal micro-purchase threshold; purchase cards clear it. NODE 04 and 09 are built to order: 50% deposit, quotes hold 30 days. Care is flat per machine, adjusting up to 5% annually. Prices as of July 15, 2026 and subject to change.

01 THE CLEAN ROOM A CUI enclave, designed and built inside your facility: segmented network, a bay for your Node, view-only endpoints, documentation pack for your assessor. \$25,000 TO 10 SEATS \$45,000 TO 25 SEATS Fixed price; the machine is priced separately. You own it, and your IT runs it with our runbook.	02 SERVICES PILOT, 30 DAYS \$2,000* READINESS SURVEY \$2,400* EXEC BRIEFING \$1,500 COURSE, HALF DAY \$2,400 COURSE, FULL DAY \$5,500 ONBOARDING FROM \$4,500 CUSTOM MODEL FROM \$12,500 * Credited in full against any machine. Custom models are tuned on your hardware; your files stay with you. Extra on-site work is \$2,400 a day.	03 ON RETAINER MANAGED CARE FROM \$600/MO MODEL DROP \$250/QTR AI OFFICER FROM \$2,500/MO Model drop: each quarter's best open model, installed and briefed on-site. Included with NODE 04/09 care. AI officer: a standing operator building prompts, workflows, and small tools for your staff.
